

Special Housings for Ceramic Membranes

Somicon has supplied ceramic membrane plants for a wide range of applications. We are aware of the fact that special applications require special housing materials. Some examples are:

- Internally rubber lined stainless steel
- Hasteloy
- Titanium
- Internally polymer lined stainless steel
- PVC / PVDF

It is difficult to generalize this area. We request you to kindly fill out the form and let us find you the right material for your application.

Application: _____

pH: _____

Temperature (°C): _____

Solvents: (1): _____ % _____ (2): _____ % _____

Others: _____

Salt(s): _____ % _____

Acid(s): _____ % _____

Alkali: _____ % _____

Your favourite material: _____

Possible materials: _____

Recommendation on Seals: _____

Testing of Material (service by Somicon):
